MATHS VIDEOS FOR PARENTS

The White Rose Maths Hub that some of you may be familiar with from home learning have produced some fantastic, short and very clear videos explaining about how place value, subtraction, multiplication, division, fractions and algebra are now taught in school. The videos also have free, downloadable easy to follow, step by step guides with copies of resources that we use in school. Please check them out!

Mathematics curriculum, what is taught, when and how?

Our school website has a number of relevant documents to the maths curriculum e.g. our Intent, Implementation and Intent Statement, supported with long-term plans for each year group with information about the units to be taught across the year. For further information regarding the methods used in school, please refer to our Calculation Policy which is also available on our school website and outlines the stages of learning formal written methods for addition, subtraction, multiplication and division.

Number facts and Times tables

When it comes to number facts and times tables, speed AND accuracy are important – the more facts your child remembers, the easier it is for them to do harder calculations. Times tables are recognised as essential to access many mathematical concepts and knowledge across the maths curriculum. Times Table Rock Stars and Numbots are a fun and challenging programme designed to help pupils master their Number Facts and times tables! Practising everyday will help develop your child's accuracy and fluency. Use the links below to access these. The username and password are the same for both websites.

1 minute Maths App

White Rose Hub have also created a new 1-minute maths app which helps your child to build greater number confidence and fluency. It's all about targeted practice in engaging, one-minute chunks!

Check out these 7 top reasons for using 1-minute maths!

1. Excellent practice – and no distractions.
2. A clear, intuitive process that children pick up straight away.
3. No login or internet access needed. Just download and play.
4. Enjoyable and motivating… How many can they get correct in one minute?
5. Helpful hints match those used in class.
6. Brilliant for building number fluency and confidence.
7. It's FREE!
